### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the abstract, change "The present invention provides a ball valve to control flow a flow of a fluid. The" to --A--.

2. The following changes to the drawings have been required by the examiner: Figs. 1-3 need "Prior Art" labels. Fig. 5 is missing packing 700 and Fig. 6 is missing ring unit 500. In order to avoid abandonment of the application, applicant must make these above drawing changes.

### *Oath/Declaration*

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

CORRECT STATEMENT should read "I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56."

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is a ball valve having the combination of symmetrical first and second casings of thermosetting resin having a ball seat, coupling flange, lever receiving part, ring shaped groove, plurality of coupling holes and a stopper with a ring unit having a first ring part seated in both the ring shaped grooves and a second ring part integrally coupled to the first ring part and seated in first and second ring shaped grooves on the first and second lever receiving parts with a cap fastening both the first and second lever receiving parts .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hunziker, Iff, Vinciguerra, Scaramucci, and Freed disclose ball valves with symmetrical first and second valve casings. McFarland disclose caps on ball valves. Paitchell discloses thermosetting resin in ball valves.
